According to the Standards of the Austrian Society for Underwater and Hyperbaric
Medicine and EDTC/ECHM Standards

Name:

DOB:

was examined on.....

He/She was found fit to dive for recreational scuba diving:

- without any limitations.
- with the following limitation only (e.g. diving in group under surveillance, limitation of depth, no current, low bubble diving, premedication with.....)

.....

temporarily NOT FIT to dive until.....

NOT FIT TO DIVE

Next Fit to Dive Test proposed :

He/she was informed that changes in the state of health (e.g. infectious diseases or other intercurrent health disturbances,.....) or pregnancy may render him/her temporarily or permanently unfit to dive.

In case of intercurrent infections or other severe health disturbances the fitness to dive has to be reevaluated.
